

Sierra Wireless AirPrime MC8700 intelligent embedded module

Key features:

- HSPA+ with peak downlink speeds up to 21 Mbps and peak uplink speeds up to 5.76 Mbps
- World class product performance, quality and reliability
- Solid documentation, tool development and consultation services
- Solid support for device integration and verification
- Comprehensive SDK and enabling software
- Flexible driver strategy with NDIS support and non-NDIS abilities

Key benefits:

- High-speed, broadband connectivity
- Best-in-class technical and integration support
- Easy integration
- Premium functionality and performance
- Compact size and light weight
- Antenna diversity for improved fringe performance
- Quad-band for global connectivity

Air Interface EDGE, GPRS, GSM, HSDPA, HSUPA

Frequency Bands 1900 MHz, 2100 MHz, 850 MHz, 900 MHz

Approvals FCC, IC, CE, GCF-CC, PTCRB, A-Tick, Telstra, T-Mobile

Standby and Idle Power 4-5mA

GSM GPRS Max Power 2.6A

HSxPA Max Power 720mA

USB USB 2.0 high speed

Flash LED Output 1

PWM Buzzer No

Keyboard Interface No

SIM Interface 1.8V or 3V

Antenna Diversity Yes

Embedded SIM No

Device Management No

Drivers Mac OS X, Windows, Windows 2000, Windows 7, Windows 7 Mobile Broadband, Windows XP SP2, Windows Vista, Windows Vista 64, Windows XP, Windows XP x64

Device Dimensions 51x30x4.5mm

Operational Temperature -25°C to +60°C
